SECTOR: INDUSTRIAL

FORD DISTRIBUTION CENTRE

Pottruff Road, Paris ON

DESCRIPTION:

Callidus Engineering provided the design for the 570,000 square foot facility is a new distribution centre for Ford Canada. The new facility offers climate-controlled space, with over 80 dock-level doors and parking for more than 370 trailers. This facility is one of the two new distribution centres Ford has built in Ontario recently.

CONSULTING SERVICES:

Callidus completed the electrical design for the new distribution centre. The design encompassed the entire electrical for the facility from the incoming 3000A service, emergency and mobile generator design, lighting, site lighting, security and all required general power. The design also had to meet the requirements of Ford Canada. During construction, Callidus completed regular field reviews to ensure the installation was meeting the drawing and client requirements.
