GO RAIL OPERATIONS COMMAND CENTER

65 Front Street West, Toronto, Ontario

DESCRIPTION:

Callidus designed mechanical and electrical systems for the new command center in Union Station, Toronto. The command center is critical to the daily operations of GO Transit's rail fleet. The challenges of this project included space constraints, noise from the rail lines above, and the amount of communications devices required in a small space. Construction was complete in June of 2010.

CONSULTING SERVICES:

Callidus designed mechanical and electrical systems for the new command center in Union Station, Toronto. The command center is critical to the daily operations of GO Transit's rail fleet. The challenges of this project included space constraints, noise from the rail lines above, and the amount of communications devices required in a small space. Construction was complete in June of 2010.

STATUS:

Completed 2010
