HERITAGE BUILDING CONDITION ASSESSMENTS

Various Locations

DESCRIPTION:

Evaluation and report on existing conditions of plumbing, mechanical-HVAC, and electrical systems serving designated heritage buildings throughout Ontario. Preparations of opinions of cost to support reserve funds and heritage foundation budgeting.

CONSULTING SERVICES:

Callidus Engineering provided visual site inspection and detail condition assessment of the existing mechanical, plumbing, fire protection and electrical systems currently serving the facility. A report was generated which included details of the building systems, major equipment including manufacturer and year of in-service, present condition and anticipated life expectancy. Report included estimated repair/replacement costs.

STATUS:

Completed
